Madrid, 13 April 2021

Dear Prof. Spence,

I am writing in regard to your letter, dated 23 March 2021, in which you provided clarification regarding movement of potential *Xylella*-host plant material from Spain to Great Britain (GB).

In order to be able to use parts (b) and (c) of both points 4 and 5 of your new requirements regarding *Xylella fastidiosa*, for certification purposes, please find enclosed a link to the National Register of Producers of Seeds and Plants of Spain (*Registro de productores de semillas y de plantas de vivero*):

<https://www.mapa.gob.es/app/consultasprosemplan/ProductorConsulta.aspx?id=es>

The information included in this dynamic register is updated regularly. The register allows to make searches by plant species, Autonomous Community, province, municipality and registration number, among other criteria.

Spain is currently in the process of consolidating its national and regional databases of producers and suppliers of plant material into a single register. In the meantime, also please find enclosed the link to the Register of producers and suppliers of plant material of the Autonomous Region of Catalonia:

<https://analisi.transparenciacatalunya.cat/Ind-stria/Registre-oficial-d-empreses-provedores-de-materia/jkpt-i8eh>

FIRMANTE(1) : VALENTIN ALMANSA DE LARA | FECHA : 14/04/2021 11:38 | Sin acción específica

Should you have any questions about the online registers, please do not hesitate to contact us.

I hope that the links provided here serve to comply with the requirement set out in the GB legislation that the national plant protection organisation of the country of origin needs to previously provide the national plant protection organisation of the United Kingdom with written details of the places of production that plan to use the aforementioned options.

Yours faithfully,

C/ ALMAGRO, 33
