

Genus & species

1. As part of creating the notification, instead of entering the commodity code, you can use genus and species. Enter the genus & species (as you start to type, matching data will appear).
2. The commodity tree below will shorten when the genus and species is added – select from the commodity tree as appropriate (for example, 'Live trees and other plants, bulbs, roots and the like, cut flowers and ornamental foliage' or 'Edible fruit and nuts, peel of citrus fruit or melons' or 'Oil seeds and oleaginous fruits, miscellaneous grains, seeds and fruit, industrial or medicinal plants, straw and fodder').
3. Continue selecting and narrowing down the choice, e.g., selected 'Apples, pears and quinces, fresh'.
4. Select 'Apples' / select 'Other' / select 'Other'.
5. The commodity has been added to the notification. Continue adding the commodity details as per usual process.
