

## List of regulated EU goods requiring a PC and pre-notification for Phase 2.

Plant health controls on EU regulated plants and products are being introduced in stages from 1 January 2021, to help business adapt as the transition period ends.

This guide provides guidance on the EU plants, plant produce and other regulated objects which will require a phytosanitary certificate and pre-notification for import to GB in phase 2.

In phase 2, the phytosanitary certificate requirements for EU regulated plants and products will fall into two categories:

- 'Regulated and Notifiable' – material you can only bring into GB with a phytosanitary certificate and must be notified in advance of landing
- 'Regulated' – material you can only bring into GB with a phytosanitary certificate but does not require advanced notification of landing

This guide is divided into different commodity groups:

- General
- Parts of plants, other than fruits and seed. This includes cut flowers, parts of plants for decoration or culinary purposes, and vegetables.
- Fruits
- Seeds for planting
- Isolated bark
- Wood

For details of the phytosanitary certification requirements, please refer to Schedule 10 of The Plant Health (Phytosanitary Conditions) (Amendment) (EU Exit) Regulations 2020.

A full definition of 'plants', 'plant products' and 'plants for planting' can be found in Article 2 of the Plant Health Regulation 2016/2031.
